INTEGRATED CHRONOLOGY · REVISION 2 · 28 OCTOBER 2026

Texts in time

Empires, events and scholarly works in one chronological field

Chronology · textual relations · evidence · interaction design

295 catalogue entries · 286 textual relations
45 political periods · 36 selected events · no individual reign rows

Compact empire and state bands sit directly above one shared time axis. Works and historical event labels are interleaved below it; event rules continue through the text field. Colors and codes distinguish intellectual traditions without separating them into tall panels.

Full reference edition. Includes the complete chronological network, period enlargements, historical source register, website specification and every work/relationship record from the critical atlas.

Read down a date, then follow a textual connection
Empire durations, events and works share one calendar.
A vertical event rule aligns a historical moment with the texts.
An arrow between works states an evidenced textual relationship.

Political history is selected for this corpus, not an exhaustive history of every Islamic region. Dates refer to texts or explicit bounds; author lifetimes remain separately recorded.

How to read a historical timeline without inventing dates

One proportional axis

Time runs left to right. The main Islamic view covers 570–2026 CE; the ancient prelude extends to 600 BCE. Every panel states its range. The complete network retains the ancient material and all later textual links.

A point is a stronger claim than a bound

152 entries use an upper-bound marker in this chronological view. A text labelled “before 1897” is not plotted as a work written in 1897. Its triangle marks a latest bound with an open direction into the past. No lower endpoint is invented.

Ranges and multiple stages

Bands show the range recorded in the catalogue. They may cover an uncertain date, writing and revision, a multi-volume series or a contextual span. A band does not assert that writing continued throughout every intervening year.

Three unplaced context entries

The Buddha narrative antecedents, ancient Iranian sages invoked in medieval claims, and undated Upaniṣadic source strata stay on an undated rail. The 1657 Persian translation is a reception witness, not the birth date of its Sanskrit sources.

One field for history and scholarship

Empire and political-period bars are packed above the common axis. Event labels occupy gaps among the works, with vertical rules through the same field. Individual reigns and the ceremonial Cairo Abbasid office are omitted. The surviving spans are scoped political periods, not territorial borders; 2026 remains a chart cutoff.

What a calendar position cannot establish

A latest bound may fall within a reign even when the work was written earlier. The graphic supplies context; patronage, teaching or causal influence needs independent evidence. All 286 textual relations retain their earlier type, scope and qualification.

Symbols, colors and evidence

Dated · Sharḥ al-Mawāqif
beginning Shawwāl 807/1405
Year-level date; read the original date label for finer precision and qualifications.

Range / stages · al-Shifāʾ
1010s–1020s; completed in Isfahan
An approximate catalogue window supports positioning. Its numerical endpoints add no precision beyond the original date label; the centre only positions that label.

Latest bound · Ḥāshiya ʿalā al-Shifāʾ
before 1897
The cap marks a latest bound or attestation, not a verified composition year. The open direction has no established lower endpoint.

Publication witness · Raḥīq-i makhtūm: sharḥ-i ḥikmat-i mutaʿāliya
by 2002–03; publication continued 21st century
Shows the early publication witness in 2002–03. Later volumes continued in the 21st century; no final composition or series-closing date is asserted. The original catalogue range is preserved separately.

Undated context · Selected Upaniṣads [translation-source corpus]
predates the Persian translation of 1657; strata undated here
The 1657 Persian translation supplies a reception witness, not a date of origin for the selected Sanskrit texts. Kept in the undated context rail.

The same reception colors and printed codes are retained. A work’s textual family does not certify its author’s assent. “Independent” means a standalone work rather than a commentary.

Specific chronological display decisions

W030 · Nihāyat al-marām fī ʿilm al-kalām
Writing began before 1297; c. 1320 concerns the extant portion. The plotted approximation is not a whole-work completion bound.

W064 · Sharḥ Hidāyat al-ḥikma
Conditional upper bound: before 1636 on the revised death chronology, before 1640/41 on the traditional one. Neither is a composition year.

W065 · Sharḥ Ilāhiyyāt al-Shifāʾ
Conditional upper bound: before 1636 on the revised death chronology, before 1640/41 on the traditional one. Neither is a composition year.

W066 · al-Mashāʿir
Conditional upper bound: before 1636 on the revised death chronology, before 1640/41 on the traditional one. Neither is a composition year.

W067 · al-Shawāhid al-rubūbiyya
Conditional upper bound: before 1636 on the revised death chronology, before 1640/41 on the traditional one. Neither is a composition year.

W068 · al-Ḥikma al-ʿarshiyya
Conditional upper bound: before 1636 on the revised death chronology, before 1640/41 on the traditional one. Neither is a composition year.

W295 · Selected Upaniṣads [translation-source corpus]
The 1657 Persian translation supplies a reception witness, not a date of origin for the selected Sanskrit texts. Kept in the undated context rail.

W230 · Nūr al-fuʾād (also Nūr al-ṣadr)
The label explicitly dates the final form to 1886–87. Earlier writing is attested before 1872–73; this bar is not the full writing duration.

W210 · Taʿlīqāt on al-Baṣāʾir al-Naṣīriyya
1898 dates the annotated publication, rather than a newly inferred date of the medieval base text.

W108 · Abwāb al-hudā
1946 is the author-death bound. The later posthumous publication mentioned in the catalogue does not date composition.

W116 · Raḥīq-i makhtūm: sharḥ-i ḥikmat-i mutaʿāliya
Shows the early publication witness in 2002–03. Later volumes continued in the 21st century; no final composition or series-closing date is asserted. The original catalogue range is preserved separately.

W196 · Buddha-life narrative traditions (unidentified template)
Unplaced on the numerical axis. The catalogue states what is known; no ancient date is invented.

W243 · Ancient Iranian sages in Suhrawardī’s claimed genealogy
Unplaced on the numerical axis. The catalogue states what is known; no ancient date is invented.

Website interaction: a readable entrance to the full archive

The recommended entry view
Open with a historical overview and a small set of representative texts. Use compact empire/state bars directly above the shared text field. Interleave event callouts among the works and extend their date rules through the diagram. Omit individual reign rows. Keep a time brush or range control visible, and let the reader expand a century or search for a text. Reveal the complete 286-relation network when requested.

Three synchronized views
Timeline answers “when and alongside what?” Relations answers “what does this work draw on, and who responds to it?” Catalogue gives a searchable, accessible list. The same selected work, filters and evidence records persist when the view changes.

Click a work
Open a persistent side panel on desktop and an accessible below-map panel on a phone. Show Arabic and transliterated title, author and life dates, work date and its basis, genre, region, reception family, qualifications, edition/scale notes, sources, and incoming/outgoing relationships. Clicking the author lists that author’s works.

Click an arrow
Reveal the source work, receiving work, relation type, evidentiary confidence, scope note and citations. A commentary, criticism, author reference, source testimony and hypothesis remain distinct. The panel must explain the exact claim instead of showing only “influenced by.”

Click political context
Open the empire/period or event record with scoped dates, region, uncertainties and historical citations. Highlight the selected period’s span or the event’s vertical rule through the text field. Temporal overlap never becomes a textual influence edge. Selected context may be compared with the text, but no patronage is inferred from coincidence.

Zoom changes the amount of detail
At overview scale show representative titles or labelled clusters. At a regional/century scale reveal individual works. Once a work is selected, highlight its immediate sources and reception and allow a second-hop expansion. Make omitted/off-screen relations countable and accessible from the panel.

Keep the diagram stable
Use a fixed chronological axis and stable positions within the common field. Color and text codes distinguish reception families; they do not need separate vertical panels. Avoid a continually moving force layout. After selection, retain the current time window unless the user asks to fit the neighbourhood. Preserve selection and filter state in a shareable URL.

Mobile and keyboard access
Essential information is available on click/tap and keyboard focus, not hover alone. Provide comfortable touch targets, zoom buttons, clear filter labels, a reset control and a table alternative. A visible relationship list supplies an accessible alternative to selecting a thin line.
[WEB03] [WEB04]

Website implementation: preserve the research while changing the view

One research dataset, several presentations
Keep stable work, author, relation and historical-context IDs in one versioned JSON dataset. Generate the PDF, map, catalogue and work detail pages from those records. Retain dates as structured uncertainty-aware objects alongside the original scholarly label.

Recommended rendering
For this corpus, an SVG timeline is sufficient and keeps text crisp and interactions inspectable. D 3 linear scales and zoom/brush behaviour are a suitable production option; the supplied demonstration implements the core interactions without external dependencies. The recommendation is an engineering judgement, not a benchmark claim.
[WEB01] [WEB02]

Keep scholarly content in ordinary pages too
A work URL should render its complete record even without the diagram. Proposed routes: /atlas/timeline, /atlas/relations, /atlas/works/<stable-id>, /atlas/authors/<stable-id>, and /atlas/relations/<edge-id>. The public site should publish only the records and sources intended for readers.

Separate data fields from display decisions
A temporal anchor positions a label; it is not an asserted composition year. Preserve minimum/maximum bounds, date basis, original AH or SH wording, recensions and publication witnesses. Keep intellectual membership multi-valued even when a map uses one principal color.

Filters must not silently rewrite the argument
Filtering hides records from a view, never deletes their evidence. Show the number of hidden relations and provide “view all connections.” Keep uncertainty controls visible: confirmed formal relations, qualified broader links, hypotheses and claimed ancestries are different selections.

Acceptance checks for integration
All 295 entries and 286 relationships must resolve by ID. Arabic and transliteration search must find equivalent targets. Upper bounds retain their symbols. Touch and keyboard users can open the same details. Back/forward restores the selected record. PDF and site cite the same source record.

Prototype and production scope
The accompanying interactive diagram demonstrates the proposed content and navigation. Production integration should adopt the site’s existing reader chrome, permanent URLs and publication workflow. The diagram’s role is to lead into the research record and primary-text reading, not to replace them.

Empires and events: scoped dates and sources

HEP 25 · Sasanian Empire: background
224–651 · Iran and Mesopotamia; extent changed
Non-Islamic context. The conventional dynastic endpoint is the last ruler’s death, after substantial territorial losses during the conquests.
[HE35]

HEP 26 · Eastern Roman / Byzantine context
c. 330–1453 (conventional bounds) · Eastern Mediterranean and Anatolia; extent changed
Non-Islamic context. Constantinople’s refoundation supplies the conventional beginning; Latin occupation in 1204–1261 displaced Byzantine rule to successor states.
[HE36]

HEV 01 · First revelations in Islamic tradition
c. 610 · Mecca
Conventional traditional chronology of the beginning of Muḥammad’s revelations; the year is approximate.
[HE01]

HEP 01 · Medinan community under Muḥammad
622–632 · Medina and Arabia
Begins with the Hijra to Medina; this is a political-community interval, not the beginning of Islam’s prophetic chronology.
[HE01]

HEV 02 · Hijra to Medina
622 · Mecca to Medina
Muḥammad’s migration marks the conventional epoch of the Islamic calendar and the beginning of the Medinan community.
[HE01]

HEP 02 · Rāshidūn caliphs
632–661 · Arabia, Iraq, Syria, Egypt and expanding territories
Conventional four-caliph period; Ḥasan’s brief succession in 661 complicates an absolutely sharp endpoint.
[HE02]

HEV 03 · Death of Muḥammad
632 · Medina
Marks the succession setting for the early caliphate; no inference about immediate stabilization of institutions is implied.
[HE01]

HEV 04 · First civil war / First Fitna
656–661 · Arabia, Iraq and Syria
Conventional interval from the killing of ʿUthmān through the contested succession associated with ʿAlī and Muʿāwiya.
[HE02]

HEP 03 · Umayyad caliphs at Damascus
661–750 · Damascus-centred empire
Caliphal dynasty based in Damascus; its Iberian successor branch is shown separately.
[HE03]

HEV 05 · Karbala
680 · Iraq
Ḥusayn b. ʿAlī and companions were killed; a central event in subsequent Shiʿi memory and communal history.
[HE30]

Empires and events: scoped dates and sources · continued

HEP 04 · ʿAbbāsid caliphs in Iraq
750–1258 · Iraq; imperial reach changed substantially
Caliphal office, not continuous territorial sovereignty; regional control and political strength varied greatly.
[HE04] [HE05]

HEV 06 · Abbasid takeover
750 · Iraq and the eastern caliphate
The Abbasids displaced the Damascus Umayyads; the later Iberian Umayyad line is represented separately.
[HE03] [HE04]

HEV 15 · Major Greek-to-Arabic translation activity
8th–10th centuries (schematic window) · Iraq and connected scholarly networks
A rounded contextual interval for multiple translation circles, drawing on earlier Syriac transmission; not the lifespan of one academy.
[HE34]

HEP 07 · Umayyad emirate of Córdoba
756–929 · Al-Andalus
Independent Umayyad emirate; the same ruling line assumed a caliphal title in 929.
[HE07]

HEV 07 · Foundation of Baghdad
762 · Iraq
A new Abbasid capital was founded; its later scholarly importance requires specific evidence beyond the foundation date.
[HE05]

HEP 09 · Aghlabids
800–909 · Ifrīqiya
Regional dynasty acknowledging nominal Abbasid suzerainty; included here as western Islamic political context.
[HE08]

HEP 17 · Sāmānid emirate
819–999; resistance to 1005 · Transoxiana and Khurasan
The main regime fell in 999; longer dynastic chronologies include subsequent resistance ending in 1005.
[HE14] [HE15]

HEV 08 · Mihna: institution and reversal
833–848/49; dismantling to 851–52 · Abbasid domains
The inquisition began in 833; reversal in 234 AH (848–49) preceded further dismantling in 851–52.
[HE29]

HEV 09 · Samarra as Abbasid capital
836–892 · Iraq
The caliphal court’s principal seat shifted from Baghdad to Samarra during this interval.
[HE05]

HEP 06 · Fāṭimid caliphate
909–1171 · North Africa; then Egypt and parts of Syria
Founded in North Africa; Egypt conquered in 969 and the caliphal court transferred to Cairo in 973.
[HE06]

Empires and events: scoped dates and sources · continued

HEP 08 · Umayyad caliphate of Córdoba
929–1031 · Al-Andalus
A rival caliphal claim concurrent with Abbasid and Fatimid claims; political fragmentation preceded formal abolition.
[HE07]

HEP 18 · Būyid principalities
c. 932–1062 · Western Iran and Iraq
Several branches: Baghdad was controlled in 945–1055, while the dynasty's Fars branch survived until 1062.
[HE16] [HE17]

HEV 10 · Fatimid conquest of Egypt and foundation of Cairo
969 · Egypt
Military conquest and Cairo's foundation occurred in 969; the caliphal court moved there in 973.
[HE06]

HEV 11 · Construction and opening of al-Azhar mosque
970–972 · Cairo
Mosque construction began in 970 and the first Friday prayer followed in 972; this does not date an unchanged modern university.
[HE32]

HEP 10 · Zīrids of Ifrīqiya
972–1148 · Ifrīqiya
North African branch only; the Hammadids and the separate Andalusian Zirid branch have different endpoints.
[HE09]

HEP 19 · Ghaznavids
977–1186 · Afghanistan, Khurasan and Punjab
Broad dynastic span; its later territorial centre and reach differed substantially from those of its expansionary phase.
[HE14]

HEP 20 · Great Seljuq dynasties
1038–1194 (broad dynastic span) · Iran, Iraq and adjacent regions
A broad chronology combining changing centres of power and regional branches, rather than one unchanged imperial territory.
[HE14]

HEP 11 · Almoravid movement and rule
c. 1040–1147 · Western Sahara, Morocco and Al-Andalus
The early bound dates the movement; Marrakesh-centred state formation belongs to the later eleventh century.
[HE10] [HE11]

HEV 12 · Baghdad Niẓāmiyya opens
1067; construction from 1065 · Baghdad
The Baghdad Niẓāmiyya opened in 1067; madrasas existed earlier, so this is not the origin of the institution.
[HE31]

HEP 22 · Seljuqs of Rūm
c. 1081–1308 · Anatolia
Origins are poorly documented; the approximate opening follows Iranica, while later rulers operated under Mongol dominance.
[HE19]

Empires and events: scoped dates and sources · continued

HEP 21 · Anūshteginid Khwarazmshahs
1097–1231 · Khwarazm and expanding Iranian/Central Asian domains
Begins with the ruling dynasty proper; Anūshtegin's earlier nominal appointment around 1077 is a different chronological marker.
[HE18]

HEV 13 · Crusaders take Jerusalem
1099 · Jerusalem
Capture during the First Crusade changed the city's political rule; no intellectual influence follows from chronology alone.
[HE33]

HEP 12 · Almohad movement and rule
1121–1269 · Maghrib and Al-Andalus
The movement begins before conquest of Marrakesh in 1147; regional control subsequently changed.
[HE10] [HE11]

HEP 23 · Ayyūbid rule in Egypt
1171–1250 (Egypt) · Egypt
Egyptian sultanic rule only; other Ayyubid branches survived the Egyptian transition to Mamluk government.
[HE20]

HEV 14 · Ṣalāḥ al-Dīn retakes Jerusalem
1187 · Jerusalem
Jerusalem returned to Muslim rule under the Ayyubids; the date supplies political context rather than a textual genealogy.
[HE20]

HL_P 12 · Delhi Sultanate
1206–1526 · Northern South Asia
A succession of dynasties, not one royal house or a constant territorial extent.
[HL16]

HEP 14 · Ḥafṣids
1229–1574 · Ifrīqiya, centred on Tunis
Broad dynastic span in Ifrīqiya; political authority and territorial extent varied during these centuries.
[HE11]

HEP 15 · Naṣrids of Granada
1232–1492 · Southern Iberia, centred on Granada
Dynastic rule ended with Granada's surrender; this date does not mark the disappearance of Iberian Muslims.
[HE13]

HEP 16 · Zayyānids / ʿAbd al-Wādids
c. 1235–c. 1555 (bounds differ) · Tlemcen and central Maghrib
Sources give 1235–1550 or 1236–1555; the dynastic span includes interruptions, notably Marinid occupations.
[HE11] [HE12]

HEP 24 · Mamluk sultanate
1250–1517 · Egypt and Syria
Sultanic government in Egypt and Syria; the contemporary Cairo Abbasid office is represented separately.
[HE21]

Empires and events: scoped dates and sources · continued

HL_P 01 · Ilkhanids: united state
1256–1335 · Iran / Iraq / Caucasus
The united state ends in 1335; later Ilkhanid claimants explain the broader 1256–1353 dynastic period.
[HL01]

HL_E 01 · Mongol capture of Baghdad
1258 · Iraq
Ends the Baghdad Abbasid caliphate; the later Cairo caliphal office is a separate historical continuation.
[HL01]

HEP 13 · Marīnid rule: post-Almohad phase
1269–1465 (Marrakesh phase) · Morocco
The bar begins with the fall of Almohad Marrakesh, not the earlier emergence of the Marinid dynasty.
[HE11]

HL_P 11 · Ottoman state and empire
c. 1300–1922 · Anatolia / Balkans / Arab lands
Approximate emergence; 1922 marks abolition of the sultanate, while the caliphal office survives until 1924.
[HL11] [HL13]

HL_P 02 · Ilkhanid successor claimants
1335–1353 · Iran / Iraq
Fragmented successor claims follow the united dynasty; this bar does not assert continuing empire-wide control.
[HL01]

HL_P 03 · Timurid dynasties
1370–1507 · Central Asia / Iran / Afghanistan
Regional branches outlast Timur’s empire; the end marks the loss of the major Central Asian and Khurasanian centres.
[HL02]

HL_P 05 · Aq Qoyunlu
1378–1508 · Eastern Anatolia / Iran / Iraq
Dynastic span; their major Iranian-Iraqi territorial phase begins in 1469. It overlaps other regional regimes.
[HL03] [HL04]

HL_P 04 · Qara Qoyunlu
1380–1468 · Eastern Anatolia / Iran / Iraq
Conventional dynastic span; territorial extent and effective control changed substantially.
[HL03]

HL_E 02 · Battle of Ankara
1402 · Anatolia
Timur defeated the Ottoman forces; the event is political context, not a textual-influence claim.
[HL02]

HL_E 03 · Ottoman capture of Constantinople
1453 · Constantinople / Istanbul
The city became the Ottoman capital; its political change is shown separately from particular scholarly migrations.
[HL11]

Empires and events: scoped dates and sources · continued

HL_E 04 · Safavid accession and Shiʿi state policy
1501 · Tabriz / Iran
Ismāʿīl's accession introduced Shiʿism as official religion; institutional and social transformation unfolded over time.
[HL06]

HL_P 06 · Safavids: principal rule
1501–1722 · Iran
The 1722 fall of Isfahan ends principal rule; Safavid claims continue until Nāder's 1736 coronation and beyond.
[HL05] [HL07]

HL_E 05 · Battle of Chaldiran
1514 · Eastern Anatolia
Ottoman victory over Safavid forces; this marker does not reduce intellectual differences to the war.
[HL04]

HL_E 06 · Ottoman conquest of Mamluk Egypt
1517 · Cairo / Egypt
Marks territorial conquest. A formal ceremonial transfer of the caliphate is not established by contemporary evidence.
[HL11] [HL12]

HL_E 07 · First Battle of Panipat
1526 · Northern India
Bābur defeated the Lodi ruler, beginning Mughal rule; the later Suri interruption remains visible.
[HL17]

HL_P 13 · Mughal dynasty
1526–1858 · South Asia
Delhi rule interrupted by the Suris in 1540–1555; later emperors held much reduced effective authority.
[HL17] [HL18] [HL30]

HL_P 14 · Suri rule at Delhi
1540–1555 · Northern South Asia
Dates the interruption of Mughal control at Delhi, rather than every surviving Suri claimant.
[HL17]

HL_E 08 · Safavid capital moves to Isfahan
1590s · Isfahan / Iran
Shown as a decade because Matthee dates the move within the 1590s, rather than imposing one precise year.
[HL05]

HL_E 09 · Fall of Safavid Isfahan
1722 · Isfahan / Iran
Afghan capture ended principal Safavid rule; later claimants and restorations must be distinguished.
[HL05]

HL_P 15 · Nawabs and kings of Awadh
1722–1856 · Awadh / Lucknow
Regional autonomy grew within the weakening Mughal order; British annexation ended the state in 1856.

[HL21]

HL_E 10 · Nāder’s coronation
1736 · Iran
The Afsharid monarchy formally replaced the Safavid dynasty.
[HL07]

HL_P 07 · Afsharids; later Khurasan
1736–1796 · Iran; later chiefly Khurasan
After Nāder’s death in 1747 the surviving Afsharid polity was largely confined to Khurasan.
[HL07]

HL_P 08 · Zand rule
1751–1794 · Western and southern Iran
Based in Shiraz; this span excludes Khurasan, where Afsharid authority continued.
[HL08]

HL_P 09 · Qajar ascendancy and monarchy
c. 1786–1925 · Iran
Start follows Amanat’s periodization; consolidation and royal coronation were later stages, not a single foundation event.
[HL09]

HL_E 11 · British annexation of Awadh
1856 · Awadh / Lucknow
Ends the autonomous state; it does not imply an immediate end to its scholarly traditions.
[HL20]

HL_E 12 · Indian Rebellion
1857–1858 · Northern and central India
Major uprising against Company rule; displayed span follows the principal military phase, with later resistance continuing.
[HL22] [HL30] [HL33]

HL_E 13 · Direct British Crown rule begins
1858 · South Asia
Government of India Act transferred administration from the East India Company to the Crown.
[HL22]

HL_P 17 · British Crown rule / Raj
1858–1947 · South Asia
Crown rule followed Company rule; direct British provinces and princely states had different constitutional positions.
[HL22] [HL23]

HL_E 14 · Iranian constitutional laws
1906–1907 · Iran
Constitution signed inDecember 1906; supplementary laws inOctober 1907. The wider Constitutional Revolution lasted longer.

W166 · On the Intellect (De intellectu)

Alexander of Aphrodisias (attributed) (fl. c.200)

Work / context date: c.200; attribution debated. No more precise composition date is established here.
Network: Greek and late antique. **Setting:** Greek-speaking Mediterranean.
Type: independent. Preserved among the Mantissa materials; assigning every argument directly to Alexander is disputed.
[G17]

W168 · Enneads (especially IV–VI)

Plotinus; edited by Porphyry (Plotinus 204/5–270; Porphyry 234–c.305)

Work / context date: Treatises c.254–269; edition 301. 254–269 is the main writing period; 301 is the edition, not Plotinus’ composition year.
Network: Greek and late antique. **Setting:** Rome / later Porphyrian editorial context.
Type: collection. Composition dates and Porphyry’s later arrangement are separate. Arabic remnants mainly derive from IV–VI.
[G06] [G07]

W169 · Isagoge (Introduction)

Porphyry (234–c.305)

Work / context date: Late 3rd c.; before c.305. No more precise composition date is established here.
Network: Greek and late antique. **Setting:** Greek-speaking Mediterranean.
Type: independent. Introduction to logical concepts; a distinct work, not a running commentary on all of Categories.
[G07] [G27]

W167 · Paraphrase of Aristotle’s On the Soul

Themistius (c.317–c.388)

Work / context date: 4th c.; before c.388. No more precise composition date is established here.
Network: Greek and late antique. **Setting:** Greek-speaking Mediterranean.
Type: commentary. A distinctive interpretation of Aristotle, not simply a neutral abbreviation.

W201 · Paraphrase of Metaphysics Lambda

Themistius (c.317–c.388)

Work / context date: Mid-4th c. proposed; before c.388. Meyrav proposes the mid-fourth century; death supplies the conservative bound.
Network: Greek and late antique. **Setting:** Constantinople.
Type: commentary. Greek original lost; reconstruction rests on Arabic fragments and the fuller Hebrew translation.
[G48]

W170 · Elements of Theology

Proclus (412–485)

Work / context date: 5th c.; before 485. No more precise composition date is established here.
Network: Greek and late antique. **Setting:** Athens.
Type: independent. A systematic Neoplatonic treatise; later Arabic redactions alter its setting and claims.
[G08]

W171 · Eighteen Arguments for the Eternity of the World

Proclus (412–485)

Work / context date: 5th c.; before 485. No more precise composition date is established here.
Network: Greek and late antique. **Setting:** Athens.
Type: independent. Preserved through Philoponus and Arabic transmission; not the Elements of Theology.
[G09] [G11]

W172 · Against Proclus on the Eternity of the World

John Philoponus (c.490–c.570)

Work / context date: 529. Reported completion in 529.
Network: Christian authored works. **Setting:** Alexandria.
Type: critique. Answers Proclus’s arguments individually.
[G09]

W173 · Against Aristotle on the Eternity of the World

John Philoponus (c.490–c.570)

Work / context date: After 529, probably early 530s. No more precise composition date is established here.
Network: Christian authored works. **Setting:** Alexandria.
Type: critique. Distinct from Against Proclus; the full Greek work is lost and reconstructed from witnesses.

W174 · Commentary on Aristotle’s Categories

Sergius of Reshaina (d.536)

Work / context date: Before 536. No more precise composition date is established here.
Network: Christian authored works. **Setting:** Reshaina / Alexandria.
Type: commentary. Original Syriac philosophical exposition within an Alexandrian school tradition.
[G21] [G22]

W147 · On the Creator and the true religion

Theodore Abū Qurra (fl.c.800)

Work / context date: late 8th–early 9th century. Approximate period or reported date; see the cited evidence.
Network: Christian authored works. **Setting:** Palestine / Harran.
Type: treatise complex. Modern scholarship separates the conventionally titled treatise into multiple units. Included as dialogue context, without a fabricated direct arrow to Ashʿarī.
[E30]

W185 · On First Philosophy

Abū Yūsuf al-Kindī (c.800–after 866)

في الفلسفة الأولى

Work / context date: c.833–842 (dedication context). Dedicated to al-Muʿtasim, whose reign was 833–842; this gives a context, not a precise completion date.
Network: Arabic Aristotelian philosophy. **Setting:** Baghdad.
Type: independent. Only part survives. Aristotle, Neoplatonic metaphysics and Christian anti-eternalism are actively recombined.
[G15]

W119 · Reported theological teaching [lost corpus]

Ibrāhīm al-Naẓẓām (death disputed; often c.835–845)

Work / context date: early 9th century (activity). Approximate period or reported date; see the cited evidence.
Network: Muʿtazilī networks. **Setting:** Basra / Baghdad.
Type: reported corpus. His criticism of atomism is part of early kalām diversity; Muʿtazilism was never a single atomist doctrine.
[E03]

W118 · Reported theological teaching [lost corpus]

Abū al-Hudhayl al-ʿAllāf (death disputed, 9th century)

Work / context date: c.800–mid-9th century (activity). Approximate period or reported date; see the cited evidence.
Network: Muʿtazilī networks. **Setting:** Basra / Baghdad.
Type: reported corpus. No securely surviving authored book is used here. Doxographical reporting is shown separately from direct textual borrowing.

W148 · Kitāb al-Burhān

ʿAmmār al-Baṣrī (fl.9th century)

Work / context date: first half 9th century. Approximate period or reported date; see the cited evidence.
Network: Christian authored works. **Setting:** Iraq.
Type: independent. An Arabic Christian author responding creatively to his Islamic intellectual setting. Shared topics alone do not identify a specific Muslim source book.
[E31]

W120 · Teaching on attributes and speech [lost corpus]

ʿAbd Allāh b. Saʿīd Ibn Kullāb (d.c.854)

Work / context date: before / around 854 (activity bound). Upper bound only; no exact composition year established.
Network: Sunni kalām networks. **Setting:** Basra.
Type: reported corpus. Reports in Ashʿarī supply identifiable evidence; a source-book title cannot be recovered for each doctrine.
[E04]

W125 · Faḍīlat al-Muʿtazila [lost]

al-Jāḥiẓ (d.868/69)

Work / context date: before 868/69. Upper bound only; no exact composition year established.
Network: Muʿtazilī networks. **Setting:** Basra / Baghdad.
Type: lost work. Known through the ensuing polemical exchange.
[E16]

W149 · Refutation of the Christians [fragments]

al-Kindī (d.c.870)

Work / context date: 9th century; before c. 870. Upper bound only; no exact composition year established.
Network: Arabic Aristotelian philosophy. **Setting:** Baghdad.
Type: critique. Uses Porphyrian logical distinctions against the Trinity; fragments survive in Yaḥyā’s response.
[E32]

W175 · Risāla on the Syriac and Arabic translations of Galen

Ḥunayn ibn Isḥāq (809–873)

رسالة حنين بن إسحاق في ترجمات كتب جالينوس

Work / context date: First Arabic redaction 856; later updates. 856 dates the first Arabic redaction; later revisions continued, including posthumous additions to the tradition.
Network: Translation / adaptation. **Setting:** Baghdad.
Type: bibliography. Documentary witness to translators, patrons and textual revision. It is not itself a source of Avicenna’s metaphysical doctrines.
[G23] [G24]

W177 · Theology of Aristotle (pseudo-Aristotle)

Ibn Nāʿima al-Ḥimṣī; al-Kindī's circle (active 9th c.)

أثولوجيا أرسطاطاليس

Work / context date: 9th c.; associated with al-Muʿtaṣim's son. Patronage points to the ninth century; it does not by itself fix an exact year.
Network: Translation / adaptation. **Setting:** Baghdad.
Type: adaptation. Adapted Plotinus under Aristotle's name. The preface names translator and correction; exact allocation of interpolations is debated.
[G10]

W186 · On the Intellect

Abū Yūsuf al-Kindī (c.800–after 866)

في العقل

Work / context date: 9th c.; exact date unknown. No more precise composition date is established here.
Network: Arabic Aristotelian philosophy. **Setting:** Baghdad.
Type: independent. Early Arabic classification of intellect; not interchangeable with Farabi's later treatise.
[G15]

W117 · Early Muʿtazilī / kalām settings [context]

Wāṣil b. ʿAṭāʾ, ʿAmr b. ʿUbayd and later circles (8th–9th centuries; founders d.748 and 761)

Work / context date: 8th–9th centuries (activity). Approximate period or reported date; see the cited evidence.
Network: Muʿtazilī networks. **Setting:** Basra.
Type: context. Broad historical setting, not a jointly authored book. Its hypothesis link does not assert Buddhist influence on Wāṣil or ʿAmr individually.
[E01]

W123 · al-ʿĀlim wa-l-mutaʿallim

Attributed to Abū Ḥanīfa; transmitted by Abū Muqātil (Abū Ḥanīfa d.767)

Work / context date: 8th–9th-century transmitted text; attribution disputed. Approximate period or reported date; see the cited evidence.
Network: Sunni kalām networks. **Setting:** Kufa / Samarqand transmission.
Type: attributed treatise. Do not equate the received text's date with Abū Ḥanīfa's death. Traditional attribution and modern source criticism diverge.

W151 · ʿIshrūn maqāla (Twenty Chapters)

Dāwūd b. Marwān al-Muqammiṣ (fl.9th century)

Work / context date: 9th century (approximate). Approximate period or reported date; see the cited evidence.
Network: Jewish Arabic thought. **Setting:** Mesopotamia.
Type: independent. Early Jewish Arabic systematic theology. Christian learning and Muslim debate form its setting; no direct source-book arrow is asserted here.
[E35] [E36]

W178 · Discourse on the Pure Good / Book of Causes

Anonymous Arabic redactor (pseudo-Aristotle) (9th c. context)

كلام في محض الخير

Work / context date: 9th c. (Kindian context probable). No more precise composition date is established here.
Network: Translation / adaptation. **Setting:** Baghdad context.
Type: adaptation. Proclean propositions reworked with Arabic Neoplatonic material; not a genuine work of Aristotle.
[G43] [G10]

W199 · Buddhist–kalām contact hypothesis

Central Asian Buddhist schools; modern reconstruction (not a single author or book)

Work / context date: Possible contact in 7th–9th c.; hypothesis studied in 2018/2022. Dates describe the proposed contact setting, not a text’s composition.
Network: Context / claims / hypotheses. **Setting:** Balkh / Central Asia.
Type: hypothesis. A thematic hypothesis concerning epistemology, Samaniyya and atomism. No surviving Buddhist-to-Arabic philosophical translation is established by this node.
[G40] [G41]

W200 · Arabic epitome: On the Contingency of the World

Attributed to John Philoponus; Arabic redactor uncertain (Greek author c.490–570; Arabic milieu proposed 9th c.)

في حدث العالم

Work / context date: Arabic epitome probably 9th c.; attribution of milieu proposed. No more precise composition date is established here.
Network: Christian authored works. **Setting:** Kindian circle proposed; later Christian Arabic preservation.
Type: adaptation. Partial Greek correspondence is established; Kindian production is Mandolino’s reconstruction, not a surviving translation colophon.

W202 · Arabic Paraphrase of Metaphysics Lambda

Themistius; Isḥāq ibn Ḥunayn (translation) (Isḥāq d.910/11)

تفسير ثامسطيوس للمقالة اللام

Work / context date: Latter half of 9th c. proposed. Range follows Meyrav’s reconstruction, not a dated colophon.
Network: Translation / adaptation. **Setting:** Baghdad.
Type: translation. Arabic fragments survive; Moshe ibn Tibbon’s complete Hebrew version dates to 1255.
[G48]

W190 · Concise Exposition of Aristotle’s Metaphysics

Thābit ibn Qurra (836–901)

تلخيص ما بعد الطبيعة

Work / context date: Before 901. No more precise composition date is established here.
Network: Arabic Aristotelian philosophy. **Setting:** Harran / Baghdad.
Type: commentary. Focuses on Lambda. A Harranian Sabian philosopher’s commentary, not a Christian or Muslim text by default.
[G32] [G14]

W194 · Arabic Introduction to Arithmetic

Nicomachus; Thābit ibn Qurra (attributed translation) (Thābit 836–901)

المدخل إلى علم العدد

Work / context date: 9th c.; before 901 if attribution holds. No more precise composition date is established here.
Network: Translation / adaptation. **Setting:** Baghdad.
Type: translation. Arabic translation is attributed to Thabit; the manuscript copy is later.
[G35]

W176 · Arabic Compendium of Plato’s Timaeus

Galen; Ḥunayn (Syriac); ʿĪsā ibn Yaḥyā (Arabic) (translators active 9th c.)

جوامع كتاب أفلاطون في طيماوس

Work / context date: c.860–910 (catalogue range). Range assigned by the digital catalogue; not an exact colophon date.
Network: Translation / adaptation. **Setting:** Baghdad.
Type: translation. An extant mediated Plato: Greek compendium, Syriac translation, then Arabic.
[G20]

Dated catalogue of works and anchors · continued

W179 · Arabic Metaphysics: Ustāth / Isḥāq versions

Aristotle; Ustāth, Isḥāq ibn Ḥunayn and others (translators active 9th c.)

ما بعد الطبيعة

Work / context date: 9th–early 10th c.; multiple versions. No more precise composition date is established here.
Network: Translation / adaptation. **Setting:** Baghdad.
Type: translation_corpus. Translation corpus node. Books and versions have different histories; later authors could combine witnesses.
[G12]

W180 · Arabic Categories

Aristotle; Isḥāq ibn Ḥunayn (Isḥāq d.910/11)

كتاب المقولات

Work / context date: 9th c.; before 910/11. No more precise composition date is established here.
Network: Translation / adaptation. **Setting:** Baghdad.
Type: translation. Extant Arabic logical translation associated with Ishaq, not indiscriminately assigned to his father.
[G25]

W183 · Arabic Paraphrase of On the Soul

Themistius; probably Isḥāq ibn Ḥunayn (Isḥāq d.910/11)

شرح ثامسطيوس على كتاب النفس

Work / context date: 9th c.; before c.911 if attribution holds. No more precise composition date is established here.
Network: Translation / adaptation. **Setting:** Baghdad.
Type: translation. Arabic text survives; translator attribution is probable, not an autograph certainty.
[G19] [G44]

W126 · Faḍīḥat al-Muʿtazila [fragmentarily transmitted]

Ibn al-Rāwandī (9th century; death disputed)

Work / context date: 9th century; before Khayyāṭ's response. Approximate period or reported date; see the cited evidence.
Network: Context / claims / hypotheses. **Setting:** Iraq / eastern Islamic lands.
Type: critique. Its attack is reconstructed from the rebuttal. Do not identify hostile descriptions with the author's full surviving position.

Type: critique. A rebuttal preserving evidence about earlier disputes.
[E15]

W121 · Reported theological teaching [lost corpus]

Abū ʿAlī al-Jubbāʾī (d.303 AH /915–16)

Work / context date: before 915–16. Upper bound only; no exact composition year established.
Network: Muʿtazilī networks. **Setting:** Basra.
Type: reported corpus. Doctrines reported by Ashʿarī and later Muʿtazilīs; no single surviving source text is implied.
[E40]

W129 · Kitāb al-Ārāʾ wa-l-diyānāt [lost, quoted]

al-Ḥasan b. Mūsā al-Nawbakhtī (late 9th–early 10th century)

Work / context date: c.900. Approximate period or reported date; see the cited evidence.
Network: Imami kalām / synthesis. **Setting:** Baghdad.
Type: lost doxography. Later quotation allows partial reconstruction; the surviving fragments do not recover the whole original.
[E17] [E20]

W182 · Arabic On the Intellect

Attributed Alexander; translator uncertain (Isḥāq or Abū ʿUthmān al-Dimashqī)

في العقل

Work / context date: c.865–920 (catalogue range). Catalogue range; translator attribution remains uncertain.
Network: Translation / adaptation. **Setting:** Baghdad.
Type: translation. The translator is not securely fixed between two named candidates.

W128 · Kitāb al-Maqālāt

Abū al-Qāsim al-Kaʿbī al-Balkhī (d.931)

Work / context date: c.900; before 931. Around 900 is approximate; author-death bound is 931.
Network: Muʿtazilī networks. **Setting:** Balkh / Baghdad.
Type: doxography. An important doxographical source, not merely a name in a teacher genealogy.
[E17] [E18]

W122 · Teaching on states (aḥwāl) [lost corpus]

Abū Hāshim al-Jubbāʾī (d.933)

Work / context date: before 933. Upper bound only; no exact composition year established.
Network: Muʿtazilī networks. **Setting:** Basra / Baghdad.
Type: reported corpus. Represented through later reports, criticism, and elaboration. Attribution of an argument is not proof of direct access to a particular lost book.
[E39]

W130 · Maqālāt al-Islāmiyyīn

Abū al-Ḥasan al-Ashʿarī (d.935/36)

Work / context date: before 935/36; composition stages disputed. Upper bound only; no exact composition year established.
Network: Sunni kalām networks. **Setting:** Basra / Baghdad.
Type: doxography. A major witness to early theological diversity. Reports of a school need not indicate endorsement.
[E05]

W131 · al-Lumaʿ

Abū al-Ḥasan al-Ashʿarī (d.935/36)

Work / context date: before 935/36. Upper bound only; no exact composition year established.
Network: Sunni kalām networks. **Setting:** Iraq.
Type: independent. Short systematic theological argument, distinct from the doxography Maqālāt.
[E06]

W181 · Arabic Posterior Analytics

Aristotle; Abū Bishr Mattā ibn Yūnus (Mattā d.940)

كتاب البرهان

Work / context date: c.900–940 (catalogue range). A catalogue activity range, not a dated completion.

W152 · Kitāb al-Amānāt wa-l-iʿtiqādāt

Saʿadya Gaon (882–942)

Work / context date: before 942; conventionally 933. Death bound independently supported;933 is conventional dating, not newly established from a colophon.
Network: Jewish Arabic thought. **Setting:** Baghdad / Sura.
Type: independent. Adapts kalām questions for biblical and rabbinic commitments. The map does not treat Jewish scholars merely as translators.
[E37]

W001 · Kitāb al-Tawḥīd

Abū Manṣūr al-Māturīdī (d. 944)

كتاب التوحيد

Work / context date: Before 944 (upper bound). Composition year not established here; 944 is the author’s death and only a terminus ante quem. Included as an earlier contextual anchor.
Network: Sunni kalām networks. **Setting:** Samarqand / Transoxania; later Maturidi reception.
Type: independent. Early systematic Maturidi theology. Its arguments and wording are demonstrably received in Abu al-Muʿin’s Tabsira; this is textual reception, not a formal running commentary.
[S30]

W124 · Taʾwīlāt al-Qurʾān / Taʾwīlāt ahl al-sunna

Abū Manṣūr al-Māturīdī (d.944)

Work / context date: before 944; transmitted lecture material. Upper bound only; no exact composition year established.
Network: Sunni kalām networks. **Setting:** Samarqand.
Type: exegesis. A separate exegetical work; its citation of al-ʿĀlim is stronger evidence than an assumed generic teacher chain.
[E14] [E12]

W189 · Principles of the Opinions of the Virtuous City

Abū Naṣr al-Fārābī (c.870–950/51)

مبادئ آراء أهل المدينة الفاضلة

Work / context date: Completed 331/942–943; summaries 337/948–949. Manuscript notices distinguish the Damascus completion from Egyptian summaries.

W132 · Mujarrad maqālāt al-Shaykh Abī l-Ḥasan al-Ashʿarī

Ibn Fūrak (d.1015/16)

Work / context date: before 1015/16. Upper bound only; no exact composition year established.
Network: Sunni kalām networks. **Setting:** Nishapur.
Type: reconstruction. Collects Ashʿarī's writings but also makes interpretive choices and extrapolates when sources are silent; not a transparent verbatim archive.
[E07]

W144 · Awāʾil al-maqālāt

al-Shaykh al-Mufīd (d.1022)

Work / context date: probably 1005–16. Approximate period or reported date; see the cited evidence.
Network: Imami kalām / synthesis. **Setting:** Baghdad.
Type: independent. Compares positions, including agreements and differences with Muʿtazilīs. It is a doctrinal catalogue rather than a full demonstrative summa.
[E26]

W143 · Taṣḥīḥ iʿtiqādāt al-Imāmiyya

al-Shaykh al-Mufīd (d.1022)

Work / context date: before 1022. Upper bound only; no exact composition year established.

W115 · Maktab-i tafkīk

Muḥammad Riḍā Ḥakīmī (1935–2021)

مکتب تفکیک

Work / context date: by 1996 (publication attested). 1996 is publication date, supplying a composition terminus; second edition 1997 independently cited.
Network: Distinct Iranian critics. **Setting:** Mashhad / Tehran.
Type: independent. Modern programmatic presentation of the separation school and its claimed genealogy.

W116 · Raḥīq-i makhtūm: sharḥ-i ḥikmat-i mutaʿāliya

ʿAbd Allāh Javādī Āmulī (b.1933)

رحیق مختوم: شرح حکمت متعالیه

Work / context date: by 2002–03; publication continued 21st century. Dates are publication witnesses: 10 volumes attested 2002–03 andvol 32 announced 2020; composition start/end not established.
Network: Ṣadrian reception. **Setting:** Qom.
Type: commentary. Extensive modern Asfār exposition; evidence of continuation, not a final closure of the tradition.
Scale / edition: At least 37 numbered volumes cataloged; no current total asserted
[I25] [I26] [I27]

W196 · Buddha-life narrative traditions (unidentified template)

Buddhist narrators; no single established author (multiple ancient recensions)

Work / context date: Ancient / late antique antecedents; exact template unidentified. No numerical composition date is assigned to the unidentified antecedent corpus.
Network: Context / claims / hypotheses. **Setting:** India / Central Asia.
Type: context. Non-text anchor: Buddhist provenance of the narrative is firmer than identification of a particular Sanskrit source.

W243 · Ancient Iranian sages in Suhrawardī’s claimed genealogy

Figures invoked by Suhrawardī: Jāmāsp, Frashōstar, Buzurgmihr, Kay Khusraw, Zarathustra (Ancient and legendary figures; chronology varies)

حكماء الفرس في النسب الحكمي للسهروردي

Work / context date: claim attested in 12th century; ancient dates unassigned. Dates the medieval claim, not an ancient book.
Network: Context / claims / hypotheses. **Setting:** Ancient Iran as received in Islamic sources.
Type: context. Invoked Iranian sages and symbols; continuous source-book transmission unproved.
Additional tags: claimed ancestry / Iranian wisdom motifs.

W159 Republic
→ **W189** Principles of the Opinions of the Virtuous City
Farabi's Platonic political inheritance was probably mediated by a Galenic compendium. This is not proof that a complete Arabic Republic was available to him.
[G31]

Evidence for detailed-map relationships · continued

GE36 · L · claimed ancient lineage
Support: authorial claim; historical transmission unproved; qualified.
W156 Early Pythagorean teaching (no authentic book)
→ **W193** Introduction to Arithmetic
Nicomachus belongs to the later Pythagoreanizing tradition; the long intervening transmission cannot be reduced to direct copying of Pythagoras.
[G01] [G35]

GE37 · T · translation / adaptation

GE39 · T · translation / adaptation
Support: specialist secondary account; qualified.
W196 Buddha-life narrative traditions (unidentified template)
→ **W197** Bilawhar wa-Būdāsaf / Yūdāsaf (Arabic recensions)
Buddhist origins of the story are secure, but the exact Indian template and Iranian/Manichaean intermediary are reconstructed. Confidence is qualified for the route, not for the broad narrative origin.
[G38]

GE40 · U · citation / use / reworking
Support: specialist secondary account; high.
W197 Bilawhar wa-Būdāsaf / Yūdāsaf (Arabic recensions)
→ **W198** Kamāl al-dīn wa-tamām al-niʿma
Saduq incorporates Bilawhar/Yudhasaf narratives and uses their motifs in Imami apologetics. This is not proof of a Buddhist origin for Imami metaphysics.

W178 Discourse on the Pure Good / Book of Causes
→ **W003** al-Shifāʾ
Parallels in Ilahiyyat VIII.4 support reception, but Bertolacci questions direct access, the version used and textual layers within Shifa. This is weaker than Avicenna's explicit commentary on the pseudo-Theology.

Critical audit carried forward from the genealogical atlas

Scope was skewed [expanded]
The first atlas was useful for the Mawāqif, Maqāṣid and Tajrīd families but did not represent the full philosophical landscape. One Ibn ʿArabī work and one main Suhrawardī work could not stand for extensive continuing traditions. The revision adds separate Avicennan, Illuminationist and Akbarian networks.

An association was drawn as descent [removed]
F-01, Shifāʾ→Ishārāt, has been removed. Shared author, system and subject matter do not by themselves prove that the later book derives textually from the earlier one.
[F01]

A whole philosophy was compressed into one book [changed]
F-02 and F-04 now use an Avicennan corpus anchor; their evidence does not identify Shifāʾ specifically.
[F07] [F36]

The particular channel remains hypothetical [downgraded]
F-24, Muḥaṣṣal→Abkār, is now marked as a hypothesis about the specific source book. The shared Rāzian proof is documented; exclusive transmission through Muḥaṣṣal is not.
[F39]

Source testimony is not passage-by-passage verification [qualified]
F-21 and F-22 identify Nihāya and Abkār as sources through Jurjānī's near-contemporary preface. They now carry a distinct reported-source type. This is stronger than mere resemblance, but different from collating every borrowed passage.
[F37]

A dispute series is not one dated arrow [changed]
I-04 is now a two-headed exchange between explicitly grouped gloss series. Individual items have their own order; the group-level link must not imply a one-way chronology for the complete series.
[I03] [I04]

Commentary is not assent [qualified]
A commentary can rebut its base text, select only some positions, or use a text for a new project. The revised maps distinguish the textual relation from a thinker's doctrinal commitments; criticism and appropriation can coexist.
[I20] [I37]

Two modern dates were only print bounds [improved]
The first atlas dated Bidāya and Nihāya conservatively from checked editions. The revision records reported composition in 1390 AH/1970–71 and 1395 AH/1975–76, without pretending a precise month has been independently established.
[C01]

Critical audit carried forward from the genealogical atlas · continued

A biographical bound needs its own qualification [qualified]
Ṣadrā’s undated works now display both disputed death bounds; neither is an independently verified composition year.
[I11]

A citation is not a measure of acceptance [qualified]
A title in a catalogue verifies a commentary’s existence and base text. It does not establish classroom frequency, regional standardization, comparative rigor, or universal authority. The revised corpus is not ranked by volume count or number of arrows.

The large map was too demanding [redesigned]
The earlier full network required substantial zooming and lacked a genuine overview. The revision adds an overall family map and smaller summary maps before the detailed plates. Stronger colors are accompanied by printed stream labels, so color alone carries no essential distinction.

Greek source horizon
Starting at Avicenna hides Arabic translators’ and Neoplatonic redactors’ work. Add separate ancient source, translation/adaptation and early Arabic synthesis levels.

Buddhist route
Old encyclopaedia formulations sometimes overstate certainty of the exact Manichaean bridge. Prefer newer template-specific research; retain strong confidence for Buddhist narrative origin and qualify the transmission route.

Reception network is not a uniform school
Commentary establishes reception, including criticism; it does not establish allegiance. Give doctrinal positions separate tags.
[A13]

Avicennism continues through and beyond other syntheses
Keep early compilations, philosophical textbooks and later Shifāʾ commentary visible. Narāqī illustrates synthetic Avicennism; Jilveh illustrates critical independence; Muṭahharī illustrates continued Avicennan teaching within a Ṣadrian horizon. These are different kinds of continuity.
[A03] [A23] [A16] [A22]

A counterexample to invented textual descent
Quṭb’s Ishrāq commentary uses Shahrazūrī’s commentary; Durrat al-tāj chiefly translates Ibn Kammūna’s al-Jadīd in philosophy. Earlier suggestions that Durrat drew on Shajara lack evidence. Do not transfer a relation between authors to every work.
[A12]

Critical audit carried forward from the genealogical atlas · continued

Late Illuminationism independent of Ṣadrā
Kumījānī's Nūr al-fuʾād rejects Ṣadrā's epistemology despite its author's study with Sabzavārī. This is evidence against deriving doctrinal commitment from a teacher-student link.
[A15]

Claimed Iranian ancestry has a distinct status
Suhrawardī invokes Iranian sages; continuous transmission from ancient Iranian source books remains unproved.
[A10]

Eastern Avicenna is not automatically Illuminationism
Do not equate Avicenna's disputed Eastern philosophy with Suhrawardī's Illuminationist project. Corbin's interpretation is one influential historiographical reading, not a demonstrated equivalence.
[A24] [F01]

Date sources require criticism too
Bahmanyār's Taḥṣīl has no exact composition date: post 1037 is plausible, before 1066secure. Lawkarī's conventional 1123 death lacks secure support. Keep lifetime bounds, manuscript dates, publication dates and inferred composition ranges visibly distinct.
[A01] [A04] [A29]

Numerical errors in modern surveys
The survey preprint contains incorrect dates. Ibn Kammūna died in 1284; conversions from AH years need checking.
[A09] [A13]

No universal endpoint of the philosophical traditions
The dated modern commentaries are continuation points, not final authorities for all communities. Their genres, regional curricula, sizes and forms of acceptance differ. A multivolume commentary and a short teaching primer need distinct size/genre badges.
[A08] [A13] [A22]

Nayrīzī is not two authors or a pure adherent
Nayrīzī and Wadūd Tabrīzī are the same writer. His commentary activity coexists with criticism of central Illuminationist doctrines.
[A14]

Pseudo-Aristotle must retain its identity
Some appeals to Plato reuse the Plotinian Arabic Theology; the intermediary must remain visible.
[A10]

Critical audit carried forward from the genealogical atlas · continued

Akbarian tradition reduced to a single ingredient in Ṣadrā [Expand]
Retain the documented Fuṣūṣ→Asfār citation. Add the independent Fuṣūṣ, Miftāḥ and Nuṣūṣ commentarial families, Indian and Ottoman reception, and modern continuations. A source arrow establishes reception of some material, not agreement on every doctrine.
[K04] [K05] [I36]

Confessional colours treated as exclusive intellectual schools [Correct taxonomy]
Akbarian is a mode of textual and conceptual reception, not one Sunni/Shiʿi confession or one Sufi order. Mixed affiliations need labels or borders in addition to colour. Rūmī is not made Akbarian merely because later commentators read him that way.
[K13] [K34] [K44]

Expansion check: Teaching lineage silently converted into book-to-book arrows [Separate]
Qūnawī orally instructed Jandī; Jandī's book need not therefore depend on the written Fukūk. Kāshānī's condensation of Jandī is independently documented. Keep personal instruction out of the textual-edge layer unless a specific relationship is established.
[K04] [K07]

Expansion check: the scope of Farangī Maḥall evidence [Not established]
Baḥr al-ʿUlūm's commentary supplies a firm work-specific example. Family Sufi practice, a scholar teaching Fuṣūṣ privately, and a universally prescribed core curriculum are different claims. The sources checked do not establish Fuṣūṣ as an obligatory text in every Dars-i Niẓāmī recension.
[K34] [K35]

Expansion check: Dawwānī's works require separate evidence [Restrict]
Zawrā''s commentary names Ibn ʿArabī and describes an Illuminationist teaching context. Neither establishes a particular Akbarian source book.
[K19]

Expansion check: the Qūnawī–Ṭūsī correspondence [Do not infer Tajrīd dependence]
The correspondence is genuine and Jāmī quotes it; no Tajrīd dependency is asserted.
[K06] [K16]

Expansion check: A single exact date for Jāmī's Durra [Qualify recension]
Distinguish the short original (c. 1481) from its undated expansion. Jāmī evaluates competing positions and favours Sufi answers.
[K16]

Expansion check: Qayṣarī date and inflated scientific anticipation [Correct]
Use research datingc 1331, with separate before 1336 dedication bound. Do not repeat the older encyclopaedia's conflated 1335 death inference, Nābulusī 1791 typo or claim that Qayṣarī anticipated modern energy physics.
[K09] [K10] [K42]

Critical audit carried forward from the genealogical atlas · continued

Expansion check: Uncertain persons and death dates [Expose uncertainty]
The dictated “Mirza Haider” may mean Sayyid Ḥaydar Āmulī, but remains unconfirmed. Āmulī is last attested 1385, not securely dead then. Jandī and Kāshānī have competing death dates; modern Jīlī research favoursc 1408 over the often-repeated 1428.
[K07] [K08] [K13] [K24] [K25]

Expansion check: Retrospective sacred genealogies mistaken for transmission [Separate claimed ancestry]
Ibn Turka’s identifications of Hermes with Idrīs and Pythagoras with Seth belong to his account of sacred wisdom. They do not prove that ancient texts reached him through an unbroken chain. Likewise comparison with Hindu concepts is not evidence of Buddhist input into early kalām.
[K23] [K41]

Expansion check: Book boundaries blurred [Correct]
Jāmī’s 1459Naqd comments on Ibn ʿArabī’sNaqsh; his 1491Sharḥ comments on the fullFuṣūṣ. Qayṣarī’sMuqaddima and Maybudī’sFawātiḥ are separately circulating parts. ʿAbd al-Qādir’sMawāqif is unrelated by title alone to Ījī’sMawāqif.
[K03] [K09] [K15] [K20] [K36]

Expansion check: No final, universally deepest Akbarian book [Reject endpoint model]
The map records continuing interpretation, local teaching authority and cross-genre synthesis. It does not rank spiritual realization or philosophical depth, or make one modern gloss authoritative for all Sunnis or all Shiʿis.

Expansion check: Independent nodes without arrows [Intentional]
Where research establishes an author’s Akbarian orientation but not use of a particular named book, the node remains in its labelled family with a contextual note. A disconnected node is preferable to a fabricated direct textual dependency.

Further research qualifications

Evidence levels
A solid commentary/gloss relation identifies the actual base text. A textual-use relation requires an explicit citation or documented borrowing. Qualified broad influence identifies a philosophical background, not a claim of direct copying. Chronological succession alone creates no edge.

Dating convention
Dates concern works. Unknown works are shown with a before/after bound and null start where appropriate. A death year used as a terminus must never be displayed as an exact composition year. AH years often straddle two CE years; the month can change the correct CE year.

Iji to Taftazani: proven textual connection, contested personal connection
Taftāzānī explicitly uses Ījī's Mawāqif. Personal tutelage is disputed; his death in 1390 excludes dependence on Jurjānī's 1405 commentary.
[F26] [F27] [F28] [F29]

The Mawaqif did not appear all at once
Recent manuscript research distinguishes an early c. 1330–33 version from substantial 1349–52 revision. Jawahir al-kalam abbreviates the earlier Mawaqif; Uyun abbreviates Jawahir. Those two smaller works are discussed here but not assigned atlas nodes. Continued teaching corrections prevent treating one autograph as a universal final text.
[F26]

Why the Razi–Amidi–Iji links are warranted
Muḥaṣṣal→Mawāqif has a published textual comparison; Jurjānī names Abkār and Nihāya. The specific Muḥaṣṣal→Abkār channel remains hypothetical.
[F35] [F37] [F39]

Two Rāzīs, two Nasafīs, several Isfahānīs
Fakhr al-Dīn and Quṭb al-Dīn Rāzī differ. The creed is ʻUmar Nasafī's. Iṣfahānī here is Shams al-Dīn Maḥmūd, author of Tasdīd and Maṭāliʻ.
[F05] [F25] [F31] [F33]

Tajrid dates and identity
A probable 669 AH authorial witness is not a composition date. The Imami base generated Sunni and Imami commentaries.
[F19] [F20] [F25]

The philosophical curriculum is a parallel branch
Abhari's Hidayat al-hikma and Katibi's Hikmat al-ayn are original philosophical manuals, not commentaries on Mawaqif. Their inclusion supplies later Iranian, Ottoman and Indian curricular connections without misclassifying philosophy as a single kalam commentary chain.
[F12] [F13]

Volume counts are edition-specific
The three-volume Iṣfahānī/Jurjānī edition packages several textual layers; Ḥillī's three-volume Nihāya is independent. Volume counts cannot rank authority or rigor.
[F24] [F25]

Three precision corrections
Maqāṣid/sharḥ: January 1383. Jurjānī's Mawāqif commentary: 1405. Quṭb's Muḥākamāt: 1354. Preserve the verified AH month.
[F27] [F30] [F31]

The extent of Razi's Matalib
Shihadeh's 2025study identifies the ninth volume of the standard 1987 Saqqa edition as a separate work wrongly included. Books 2–7 have colophons betweenOctober 1208 andJanuary 1209; book 8 is probably incomplete. Therefore nine printed volumes should not be equated with nine securely identified original books.
[F10]

Scope and dating
This selection is not exhaustive. Death or print bounds remain termini, not exact composition dates.
[S01] [S02] [S29]

Central corpus without a final endpoint
The paired Ḥasan–Siyālkūtī apparatus is influential. İSAM describes a wider gloss-edition project; its planned release is not verified here.
[S03] [S29]

Regional traditions
Regions mark selected contexts; books circulated across them. A regional label does not establish an exclusive creed.
[S02] [S09] [S13]

Modern contextual nodes
Abduh's 1876 gloss has a direct textual parent. His later Risala, Sabri's Mawqif, Izmirli's Yeni Ilm-i Kelam and Shibli's two kalam books supply historical orientation without fabricated single-parent arrows. Further argument-level research would map their specific citations.
[S11] [S25] [S26] [S27] [S32]

Selected Maturidi branch
Kitab al-Tawhid and Tabsirat al-adilla provide early anchors, with documented later citations in Taftazani and Bayadi. The larger Maturidi corpus, including the Musayara/Musamara family, remains beyond this selection.
[S22] [S30] [S31]

Shibli chronology
Composition and publication dates are sometimes conflated. Syed labels the two works 1902 and 1903. Rifai reports completion in 1902 and 1903, with publication in 1903 and 1904 respectively. The atlas uses the latter publication bounds and records the distinction.
[S32] [S33]

Date discipline
A label beginning before/by is a terminus, not a composition year. Several isolated numeric coordinates mark only the latest secure bound. Publication dates for twentieth-century texts do not establish when the original teaching or writing began.
[I24] [I25] [I28] [I31] [I33]

Concurrent traditions, not a single succession
Avicennan commentators, Lāhījī, Rajab ʿAlī/Qāḍī Saʿīd, Shaykhism and Tafkīk represent distinct projects; shared criticism does not prove common descent.
[I11] [I14] [I15] [I21] [I30]

Tafkik branch
Iṣfahānī, Qazvīnī and Ḥakīmī are grouped by a documented modern school affiliation. No Abwāb→Bayān→Maktab textual-dependence arrows are asserted. Their separation of scripture, philosophy and mysticism differs from Shaykhi ontology and from Rajab ʿAlī's philosophical alternative.
[I30]

Shawāriq and Gawhar
Shawāriq is incomplete; first writing precedes Gawhar, but revisions cite it. Lāhījī's philosophical commitments are selective.
[I14]

Cross-tradition teaching
Sabzavārī's teaching repertoire included Jurjānī's Sharḥ al-Mawāqif and Lāhījī's Shawāriq alongside Sadrian works. This is curricular coexistence, not evidence that every later text comments directly on Mawāqif.
[I22]

Sadrian reception
Asfār became a major later philosophical reference, but a philosophical-school canon cannot be equated with unanimous Imami confession. Ṭabāṭabāʾī's philosophy teaching encountered opposition; modern Tafkik is another explicit counter-current.
[I23] [I30]

Known biographical date cautions
Ṣadrā: revised death 1635/6, traditional 1640/1. Qāḍī Saʿīd: alive in 1696. Khafrī: disputed death. Bounds reflect these uncertainties.
[I06] [I11] [I15]

Textbook affiliation versus textual dependence
Bidāya and Nihāya belong to a predominantly Sadrian curriculum. Their placement in this branch does not itself prove a particular Asfār-to-text borrowing, so no such arrows are drawn.
[I23]

Dawwānī–Dashtakī aggregation
Dawwānī and Ṣadr al-Dīn Dashtakī nodes aggregate multiple interventions. The evidence here establishes the dispute and common Qūshjī base, but not a fully verified installment-by-installment chronology.
[I02] [I03] [I04]

No automatic Qabasāt-to-Asfār arrow
Teacher–pupil biography alone does not warrant a Qabasāt-to-Asfār textual arrow.
[I10] [I11]

Early anchors and selection
Juwayni, Maturidi, Abu al-Muin al-Nasafi and al-Saduq are early anchors for the mapped families. The atlas does not claim to reconstruct their complete earlier genealogies or all their later commentaries.
[R01] [R02]

Kalām is not merely translated Greek philosophy
Scripture, interpretation, political and communal disputes, and intra-Muslim argument are constitutive contexts. Earlier Greek or Christian parallels do not by themselves show which text a theologian read. The map therefore includes early doctrinal corpora and doxography alongside translation networks.
[E01] [E05] [E17]

A lost corpus is not an extant book
Rounded context/corpus boxes identify the type of surviving evidence. An arrow from early teaching to a doxography says that it is reported there. It does not silently convert the report into a faithful transcript or prove that the reporting author had an original book.
[E02] [E03] [E04] [E07]

Jewish Arabic intellectual life is a participant, not a placeholder translator
Al-Muqammiṣ, Saʿadya and Yūsuf al-Baṣīr illustrate original Jewish theology in Arabic. Explicit Bahshamī reception is strongest for al-Baṣīr. The existence of Jewish Arabic learning does not justify inventing a Jewish mediation stage for every Greek-to-Arabic translation.
[E35] [E37] [E38]

Christian Arabic authors are more than translators
Theodore and ʿAmmār represent original Arabic Christian argument. Yaḥyā's reply to al-Kindī supplies a specific textual link. A simple Christian theology→Ashʿarism arrow is withheld: shared problems, encounters, and polemical resemblances are insufficient to establish a particular parent text.
[E30] [E31] [E32] [E33]

Further research qualifications · continued

Two different early Imami debates
Ṣadūq→Mufīd is a critical commentary within Imami theology. ʿAbd al-Jabbār→Murtaḍā→Muḥammad al-Ṭūsī is a cross-confessional imamate debate and abridgment. Neither establishes an unbroken textual chain to the later Tajrīd of Naṣīr al-Dīn al-Ṭūsī.
[E27] [E28] [E29]

Transmission is not a single House of Wisdom institution
Use “Abbasid translation movement” as the map heading. Distinct patrons and Christian, Sabian and Muslim scholarly circles are documented; a single Bayt al-Hikma academy directing all Greek translation is not.
[G42] [G24]

Christian intellectuals were authors and interpreters
Sergius and Philoponus belong to philosophical and theological traditions of their own. The Syriac and Christian Arabic material should not appear solely as a neutral arrow carrying Greek books onward.
[G22] [G09]

Pythagoras is an anchor, not a fictitious book
Reported teaching, later Neopythagorean reception, and retrospective sacred genealogies must receive different relations from manuscript translation or explicit borrowing.
[G01] [G02] [G05]

A Greek name can conceal an Arabic reconstruction
The Theology of Aristotle and Pure Good are Arabic Neoplatonic redactions. Keeping the Greek source and Arabic text as separate nodes prevents a false direct Aristotle-to-later-Islamic-system chain.
[G10] [G43]

Buddhist contacts require two evidentiary tracks
The Bilawhar narratives and their use by Saduq supply a concrete literary/apologetic connection. Buddhist contributions to kalam epistemology or atomism remain a debated reconstruction; similarity does not identify a translated source text.
[G39] [G40] [G41]

Buddhist hypothesis map placement
The buddhist_kalam_hypothesis node may be connected by a hypothesis edge to an early-kalam context anchor. Do not point it at a single Sanskrit book or at all later kalam doctrines. A comparison panel can place the proposal alongside the alternative historical explanations.
[G40] [G41]

No automatic Plotinus-to-India doctrine arrow
Porphyry reports Plotinus’s desire to learn Persian and Indian wisdom on the aborted expedition of 243. That biographical interest does not establish that a specific Indian doctrine entered the Enneads.
[G06]

Greek and translated source dates
Most ancient composition years are unknown. Author-death bounds identify underlying works, not the dates of later collections, manuscript copies or Arabic redactions.
[G12] [G23]

Jilveh date and crosscurrents
Jilveh died in 1897. His Avicennan commitments did not prevent annotation of Ṣadrā or Qayṣarī. These glosses evidence engagement, not wholesale adherence.
[A16]

Sabzavārī’s mixed repertoire
Sabzavārī is appropriately centered in Ṣadrian philosophy, yet directly engaged Suhrawardī and criticized some of Ṣadrā’s proofs. His teaching repertoire also included Jurjānī and Lāhījī.
[I22]

Akbarian reception: qualification
This is a selective textual atlas, not an inventory of every Akbarian work. Titles, colophons, critical-edition introductions and scholarly source identifications have priority over thematic resemblance.

Akbarian reception: qualification
All dates concern composition unless expressly labelled otherwise. BeforeYYYY is only a terminus, not a publication or completion year. Gregorian spans preserve uncertain AH conversion.

Akbarian reception: qualification
Exact book arrows require textual evidence. Conceptual influence lacking a named source work is stored separately in contextual_relations for summary maps or annotations.

Akbarian reception: qualification
K 16 primary-edition check: local scanned PDFp 332 is printedEnglishp 9. K 19 check: local PDFp 7 is printedp 3, PDFp 9 is printedp 5. OCR was used only to locate passages; these were visually read.

Akbarian reception: qualification
Further leads deliberately not promoted to firm edges: DawwānīShawākil Akbarian citations; exact FarangīMaḥall curriculum recensions; book-specific sources of Taswiya; named-source dependency of Jīlī’s whole Insān; unproven ancient Buddhist or Iranian chains.
